Art Unit: 1654

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 2 and 3, sequence 1, drawn to an amino acid sequence, classified in class 530, subclass 328.
  - II. Claims 2 and 3, sequence 2, drawn to an amino acid sequence, classified in class 530, subclass 328.
  - III. Claims 2 and 3, sequence 3, drawn to an amino acid sequence, classified in class 530, subclass 326.
  - IV. Claims 2 and 3, sequence 4, drawn to an amino acid sequence, classified in class 530, subclass 324.
  - V. Claims 2 and 3, sequence 5, drawn to an amino acid sequence, classified in class 530, subclass 327.
  - VI. Claims 2 and 3, sequence 6, drawn to an amino acid sequence, classified in class 530, subclass 329.
  - VII. Claims 2 and 3, sequence 7, drawn to an amino acid sequence, classified in class 530, subclass 326.
  - VIII. Claims 2 and 3, sequence 8, drawn to an amino acid sequence, classified in class 530, subclass 327.

The inventions are distinct, each from the other because of the materially different amino acid sequences present in each of the claimed sequences. A search of one sequence will not be sufficient for the other claimed sequences.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

2. Claims 1 and 4-15 link(s) inventions I through VIII. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 1 and 4-15. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1654

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
